

## Sammelband - Inhaltsverzeichnis

- a) Corps of Engineers: Research Report 42, Dez.1959  
U.S.Army Some Structural Properties of Greenland Snow.
- b) - " - Research Report 46, May 1959  
Visco-elastic Properties of Snow and Ice in the Greenland Ice Cap.
- c) - " - Research Report 47, May 1959  
Some Physical Properties of Ice from the TUTO Tunnel and Ramp, Thule, Greenland.
- d) - " - Research Report 49, August 1959  
Role of the Electric Double Layer in the Mechanism of Frost Heaving.
- e) - " - Research Report 51, July 1959  
Plastic Deformation of Hollow Ice Cylinders Under Hydrostatic Pressure.
- f) - " - Research Report 52, July 1959  
Investigations of Fog Whiteout.
- g) - " - Research Report 53, May 1960  
Structure of Age-Hardening Disaggregated Peter Snow.
- h) - " - Research Report 54, August 1959  
On the Mechanical Properties of Sea Ice, Thule, Greenland, 1957.
- i) - " - Research Report 55, July 1959  
Experimental Formation of Sorted Patterns in Gravel Overlying a Melting Ice Surface.
- j) - " - Research Report 56, August 1959  
The Flow Law for Ice.
- k) - " - Research Report 57, September 1959  
Plastic Deformation of Floating Ice Plates Subjected to Static Loads.
- l) - " - Research Report 58, September 1959  
Visco-Elastic Properties of Processed Snow.
- m) - " - Research Report 59, September 1959  
Elastic Plates with Simply Supported Straight Boundaries, Resting on a Liquid Foundation.
- n) - " - Research Report 63, July 1960, Plastic Deformation of Thick-Walled Snow-Ice Cylinders under Hydrostatic Pressure.
- o) - " - Research Report 65, July 1960  
Formation, Growth and Decay of Sea Ice in the Canadian Arctic Archipelago.

- p) Corps of Engineers: Research Report 67, Jan. 1960  
U.S. Army Temperature Distribution of Snow  
Gamma Ray Radiation.
- q) - " - Research Report 69, January 1960  
Theory of Densification of Dry  
Snow on High Polar Glaciers.
