

TABLE OF CONTENTS

Part I

INTRODUCTORY

	Page
Sponsors	iii
Steering Committee	iv
Subcommittee Membership	v
Introduction, Tilton E. Shelburne, Conference Co-Chairman	vii
Summary, Dr. W. H. Glanville, Conference Co-Chairman	ix
Resolutions of Appreciation to Conference Co-Chairmen	xii

REPORTS OF SUBCOMMITTEES

Subcommittee A	xix
Subcommittee B	xxvi
Subcommittee C	xxx
Subcommittee D	xxxv
Subcommittee E	xl

KINDS OF SKIDDING; ACCIDENTS INVOLVING SKIDDING

PRESIDING: E. H. HOLMES

ASSISTANT COMMISSIONER FOR RESEARCH, BUREAU OF PUBLIC ROADS

U. S. DEPARTMENT OF COMMERCE

Panel Discussion on Kinds of Skidding and Relationship to Accidents

Elements of Skidding, K. A. Stonex	1
Today's Speeds, O. K. Normann	5
Some Thoughts About Skidding, Skid Accidents, and the Human Element in Skidding, Burton W. Marsh	7
Virginia Accident Information Relating to Skidding, J. P. Mills, Jr. and W. B. Shelton	9
Cases of Skidding Accidents, J. Stannard Baker	21
Skidding as a Factor in Accidents on the Roads of Great Britain, C. G. Giles and Barbara E. Sabey	27
Accidents Involving Slippery Road Conditions in Germany, Dr. - Ing. Habil. Bruno Wehner	45

THE HUMAN ELEMENT IN SKIDDING

PRESIDING: BURTON W. MARSH
DIRECTOR, TRAFFIC ENGINEERING AND SAFETY DEPARTMENT,
AMERICAN AUTOMOBILE ASSOCIATION

Driver Knowledge, Judgement and Responses in Causation and Control of Skidding, Dr. T. W. Forbes	51
Dynamic Aspects of Driver and Vehicle Behavior, W. F. Milliken, Jr. and G. J. Fabian	59

RELATIONSHIP OF VEHICLE DYNAMICS TO SKIDDING

PRESIDING: K. A. STONEX
ASSISTANT DIRECTOR, GENERAL MOTORS PROVING GROUNDS

Fundamentals of Braking - Heat Capacity and Control, J. George Oetzel	67
Traction and Braking Characteristics of Vehicles, W. A. McConnell	81
Vehicle Road Stability as Related to Suspension Geometry, R. T. Jarman	95
The Dynamics of Vehicle Skid Deviation as Caused by Road Conditions, William Zuk	105
Experiments with a Device to Prevent Wheels Locking During Braking, R. D. Lister and R. N. Kemp	129

THE RELATIONSHIP OF TIRE DESIGN AND COMPOSITION TO SKIDDING

PRESIDING: JOHN H. COX
MANAGER, MILEAGE TIRE DEVELOPMENT, FIRESTONE TIRE AND RUBBER COMPANY

Factors in Tires that Influence Skid Resistance	
Introduction, John H. Cox	151
The Effect of Tread Design, Dr. Louis Marick	155
The Effect of Carcass Construction, Size, Cord Angle, and Number of Plies, Wade C. Johnson	163
The Effect of Tread Composition, M. A. Reinhart	167
Effect of Speed, Load Distribution, and Inflation, Clarence Hofelt, Jr.	173
Tyres and Skidding from a European Point of View, V. E. Gough and T. French	189
The Importance of Hysteresis Losses in the Friction of Lubricated Rubber, Dr. David Tabor	211
Recent Investigations on the Role of Rubber Hysteresis in Skidding Resistance Meas- urements, C. G. Giles and Barbara E. Sabey	219

REVIEW OF LABORATORY AND FIELD METHODS OF MEASURING ROAD SURFACE FRICTION

PRESIDING: RALPH A MOYER

PROFESSOR OF TRANSPORTATION ENGINEERING, UNIVERSITY OF CALIFORNIA

Historical Background of Skid Resistance Measurement--American Experience, Ralph A. Moyer	227
A Note on the Work of the Committee on Slipperiness of the Permanent Inter- national Association of Road Congresses, H. Crouzat	233
Factors Affecting the Measurement of Skid Resistance, W. H. Goetz and J. M. Rice	237
Review of Field Testing Methods	
A Review of Stopping Distance Methods of Measuring Road Surface Friction, A. W. Maner	247
A Review of Towed Vehicle Techniques for Pavement Slipperiness Testing in the United States, W. A. Goodwin and E. A. Whitehurst	257
Some European Methods for the Measurement of Skidding Resistance, C. G. Giles	267
National Advisory Committee for Aeronautics Research on Friction Measure- ments, James P. Trant, Jr.	297
Measurements with the 'Stuttgart' Test Apparatus in Germany, Oberregierungsbaurat Dr. Karl Croce, Inzell/Bayern	309

Part II

REVIEW OF LABORATORY AND FIELD METHODS OF MEASURING ROAD SURFACE FRICTION CONTINUED

PRESIDING: C. G. GILES

HEAD, SURFACE CHARACTERISTICS SECTION, BRITISH ROAD RESEARCH LABORATORY

The Correlation of Existing Laboratory and Field Test Methods on Skidding in the Netherlands, A. J. P. Van der Burgh and D. H. F. Obertop	313
Methods of Determining Road Surface Friction, G. J. Fabian	319
Tennessee's Method of Laboratory Evaluation of Potential Pavement Slipperiness, E. A. Whitehurst and W. A. Goodwin	329
Skid Prevention Studies in Kentucky, James H. Havens	333
A Laboratory Method of Evaluating Slipperiness, J. W. Shupe and W. H. Goetz	341
National Crushed Stone Association's Laboratory Method of Evaluating Slipperi- ness, J. E. Gray	351
Some Laboratory Methods for the Investigation of Skidding Problems, C. G. Giles	353

The Apparatus of the "Laboratorio Del Transporte," Madrid, for Measuring Road Surface Friction, A. Lleo and J. L. Escalera	359
The Penn State Brake Test Trailer, H. W. Kummer	363
California Type Skid Resistance Tester for Field and Laboratory Use, F. N. Hveem, Ernest Zube and J. B. Skog	365

"CORRELATION STUDY"

Comparison of Several Methods of Measuring Road Surface Friction, Jack H. Dillard and Dr. Terrence M. Allen	381
--	-----

RELATIONSHIP OF ROAD SURFACE PROPERTIES TO SKIDDING

PRESIDING: K. B. WOODS
HEAD, SCHOOL OF CIVIL ENGINEERING, PURDUE UNIVERSITY

A Review of the Variables Affecting Pavement Slipperiness, Ralph A. Moyer	411
Symposium on the Effect of Pavement Type and Composition on Slipperiness-- A Review of Present Knowledge	
Relative Skid Resistance of Pavement Surfaces Based on Michigan's Experience, E. A. Finney and M. G. Brown	435
Further Studies on Skid Resistance of Virginia Pavements, F. P. Nichols, Jr.	461
Effect of Pavement Type and Composition on Slipperiness--California Experience, Ralph A. Moyer	469
Effect of Pavement Type and Composition on Slipperiness--A Summary of Research in Indiana, Harold L. Michael	485
Surface Texture and Non-Skid Properties of Road Surfaces, A. J. P. Van der Burgh and D. H. F. Obertop	489
The Polishing of Roadstones in Relation to Their Selection for Use in Road Surfacings, D. J. Maclean and F. A. Shergold	497
Polishing Characteristics of Mineral Aggregates, J. W. Shupe and R. W. Lounsbury	509
Discussion of Shupe's Paper, D. O. Woolf	530
Discussion of Shupe's Paper, J. E. Gray	533

RELATIONSHIP OF ROAD SURFACE PROPERTIES TO SKIDDING (CONTINUED)

PRESIDING: D. B. FUGATE
ASSISTANT CHIEF ENGINEER, VIRGINIA DEPARTMENT OF HIGHWAYS

Pressure Distributions Beneath Spherical and Conical Shapes Pressed into a Rubber Plane, and Their Bearing on Coefficients of Friction Under Wet Conditions, Barbara E. Sabey	539
---	-----

Skid Prevention on Ice and Snow, A. H. Easton	549
A Note on the Problem of 'Seasonal Variation' in Skidding Resistance, C. G. Giles and Barbara E. Sabey	563
Road Slipperiness, Raffaele Ariano	569
Skid Resistance Values Used in Geometric Design, D. W. Loutzenheiser	573
Standards of Skidding Resistance: Some European Points of View, C. G. Giles	579
Preventive and Corrective Measures for Combatting Pavement Slipperiness	
Renewing Concrete Surfaces, A. R. Brickler	589
Pavement Skid Resistance, Dillard D. Woodson	597
Index of Authors and Discussers	605
