

CONTENTS

| | Page |
|--|------|
| Abstract | 1 |
| 1. Introduction | 1 |
| 2. Laboratory Experiments | 2 |
| 2.1 Factors affecting the selection of test methods | 2 |
| 2.2 Test Specimens | 2 |
| 2.3 Corrosive solutions and inhibitors tested | 2 |
| 2.4 Test Temperatures | 3 |
| 3. Results and discussion | 3 |
| 3.1 Spray tests at 25°C with bare steel | 4 |
| 3.2 Spray tests at 25°C with painted panels | 4 |
| 3.3 Spray tests at 5°C with bare steel | 4 |
| 3.4 Immersion tests at 25°C with bare steel | 4 |
| 3.5 Comparison of spray and immersion tests | 4 |
| 3.6 The effect of calcium concentration of polymetaphosphate inhibitor | 5 |
| 4. Conclusions | 5 |
| 5. Acknowledgements | 6 |
| 6. References | 6 |
| 7. Appendix 1 | 11 |
| 8. Appendix 2 | 12 |
| 9. Appendix 3 | 14 |
